Accra, Ghana (GMT) | Website | Email | LinkedIn | GitHub

SUMMARY

Software engineer working across full-stack web development, DevOps and telecom network operations. At Huawei Technologies Ghana, automated health checks across 20 charging and billing nodes for a national mobile operator and resolved 30+ network risk issues. Builds real-time web platforms in React, Angular, Node.js and PHP and runs them in Docker on Linux servers.

EDUCATION

Ashesi University **May 2022**

BSc. Computer Science

Dean's List: *2019-2021*

Capstone: *Votechain; Voter Fraud Prevention for Remote Blockchain-Based Voting Systems*

WORK EXPERIENCE

Director | Widi Modern Technology Locks Ltd **2019 - Present**

Progressed from Intern to IT Solutions Specialist to Assistant Business Development Manager

- Digitized paper records into a MySQL database with a Strapi admin interface used by staff
- Built the company website in React and Strapi, with analytics that informed inventory and sales decisions
- Built a real-time sales and expense dashboard with Google Sheets automation and trained 15 staff on internal tools
- Resolved 50+ technical issues a month, cutting office downtime by about 40 hours

Founder & Software Engineer | Mardi Technologies **Oct 2024 - Present**

- Built an admin console for Emma's Den, a children's events business, to track events, sales and expenses (React, Firebase)
- Built websites for MACSA Mining and Sage Energies with analytics and contact forms (React, EmailJS)

Applications and Service Engineer | Huawei Technologies Ghana **Nov 2022 - Sep 2024**

- Automated daily health checks across 20 online charging and billing nodes for a national mobile network operator with shell scripts, and built a secure web interface that collates their reports, replacing lengthy manual checks
- Executed 3 RFC operations to remediate client network risks and resolved 30+ medium to high severity issues
- Supported enterprise deployments: system integration, Linux administration, firewalls and VPNs
- Earned an "A" first-year appraisal, the department's top rating, and led internal training on Docker, microservices and Huawei Cloud
- During national service, tested core services for a new international telecom project through to its successful deployment

TECHNICAL PROJECTS

Real-Time Election Monitoring Platform | Co-Lead Developer **2023**

- Co-led development of the results portal for a West African national election, streaming live vote counts over SignalR into county-level results and maps, with OTP sign-in and Dockerized deployment (React, Redux)

B2B Timber Trading Platform | TheAfricanExporter, Co-Lead Developer **2023**

- Co-led development of a B2B timber marketplace with separate admin, buyer and merchant portals for quote requests, orders and user management, secured with JWT role-based access (React, Redux, Material UI)

Ashesi Living Lab | IoT Monitoring Platform, Ashesi University **2022**

- Built an IoT platform streaming light, humidity, temperature and motion data from a campus lab through a Node.js/Express API and Firebase into a React dashboard that suggests energy-saving actions

SKILLS

- Web Development: TypeScript, PHP, React, Angular, Redux, Node.js, Express, REST APIs, WebSockets, SignalR
- DevOps & Containerization: Docker, Docker Compose, Nginx, Certbot, Linux administration, DigitalOcean, AWS, Git
- Networking & Security: TCP/IP, firewall and VPN configuration, enterprise network setup
- Data: MySQL, MongoDB, Firebase, Strapi

CERTIFICATIONS & AWARDS

- Huawei Outstanding National Service Certificate **August 2023**
- Huawei Cyber Security Certification **November 2022**
- Fundamentals of Digital Marketing, Google **August 2021**
