MARK ZOIKU

Accra, Ghana (GMT) | markkwesizoiku@gmail.com | markzoiku.com | LinkedIn | GitHub

SUMMARY

Software engineer combining full-stack development, DevOps and telecom network operations. At Huawei Technologies Ghana, automated health checks across 20 charging and billing nodes and resolved 30+ network risk issues. Builds real-time applications with React, TypeScript and Node.js and deploys containerized services on Linux and DigitalOcean.

EDUCATION

Ashesi University **May 2022**

BSc. Computer Science

Dean's List: *2019-2021*

Capstone: *Votechain; Voter Fraud Prevention for Remote Blockchain-Based Voting Systems*

WORK EXPERIENCE

Applications and Service Engineer | Huawei Technologies Ghana **Nov 2022 - Sep 2024**

- Automated daily health checks across 20 online charging and billing nodes for a national mobile operator using shell scripts; built a secure web interface to consolidate reports and replace lengthy manual checks
- Executed 3 RFC operations to remediate client network risks and resolved 30+ medium- to high-severity issues
- Supported enterprise deployments through system integration, Linux administration, firewall and VPN configuration
- Earned the department's top first-year appraisal rating (A); led training on Docker, microservices and Huawei Cloud
- Tested core services for an international telecom project during national service, supporting successful deployment

Founder & Software Engineer | Mardi Technologies **Oct 2024 - Present**

- Built a React and Firebase admin console for Emma's Den to manage event, sales and expense tracking
- Delivered React websites for MACSA Mining and Sage Energies with analytics and EmailJS contact forms
- Deploy and maintain client sites on DigitalOcean using Docker, Nginx and automated TLS certificates

Director | Widi Modern Technology Locks Ltd **2019 - Present**

Joint director since 2019; progressed from Intern to Assistant Business Development Manager within the business

- Digitized paper records into a MySQL database with a Strapi admin interface for staff access
- Developed the company website in React and Strapi, using analytics to inform inventory and sales decisions
- Built a real-time sales and expense dashboard with Google Sheets automation; trained 15 staff on internal tools
- Resolved 50+ technical issues per month to keep office systems operational

TECHNICAL PROJECTS

Real-Time Election Collation Platform | Co-Lead Developer **2023**

- Co-led a React and Redux portal for a West African national election, streaming live vote counts via SignalR into county-level results and maps, with OTP sign-in and Dockerized deployment

B2B Timber Trading Platform | TheAfricanExporter, Co-Lead Developer **2022**

- Co-led a React, Redux and Material UI marketplace with admin, buyer and merchant portals for quotes, orders and user management, secured with JWT role-based access

Ashesi Living Lab | IoT Monitoring Platform, Ashesi University **2022**

- Built a Node.js/Express API and Firebase pipeline to stream lab light, humidity, temperature and motion data into a React dashboard that suggests energy-saving actions

SKILLS

- Web Development: TypeScript, PHP, React, Redux, Node.js, Express, REST APIs, WebSockets, SignalR
- DevOps & Containerization: Docker, Docker Compose, Nginx, Certbot, Linux administration, DigitalOcean, Git
- Networking & Security: Online charging and billing, TCP/IP, firewalls, VPNs, shell scripting
- Data: MySQL, MongoDB, Firebase, Strapi

CERTIFICATIONS & AWARDS

- Huawei Outstanding National Service Certificate **August 2023**
- Huawei Cyber Security Certification **November 2022**
- Fundamentals of Digital Marketing, Google **August 2021**
